

CASE STUDY

EVOLUTION E2

KEENCUT
THE WORLD'S FINEST CUTTING MACHINES

Company: Mobile Outreach Solution

Location: Ohio, USA

Name: Tom Szychowicz

Product: Evolution E2 & WorkBench

Application: Emergency Vehicle Wraps

Executive Summary

Since 1988, Mobile Outreach Solution (formerly BUSES International), a non-profit organisation, has constructed custom-built/converted vehicles into effective mobile outreach units for ministries and nonprofits.

The Problem

Mobile Outreach Solution required a cutter and table that had room enough to laminate and cut a variety of vinyl's and other materials, primarily vehicle wraps, per the production of its client's needs.

The Solution

After a great deal of research, the Evolution E2 rose to the top of the list because of its size, dependability and accuracy for cutting large wrap panels. The straight edges on the Evolution E2 enabled the business to cut perfect paths in foam board, corrugated board as well as harder materials.

Testimonial

Tom Szychowicz of Mobile Outreach Solutions says: *"This product allows us to function with greater efficiency. The design of the cutter and its interchangeable blades supply precision cutting for a variety of products. We are very impressed with our Keencut table and cutter. It has enabled us to deliver a clean and accurately cut product to our clients. This table and its abilities has allowed us to enhance our methods, while maintaining and increasing customer satisfaction."*
