

**Company:** Fine Art Incorporated  
**Location:** Dorset, UK  
**Product:** Excalibur 5000 & Ultimat Gold  
**Application:** Printing & Mounting Services

## Executive Summary

Fine Art Incorporated installed an Excalibur 5000 as well as an Ultimat Gold in December 2017 to support their growing business. They bought both products to help complement their offering and ensure they had the right cutter for both sides of their business – backing and mounting.

## Challenges

As they had two types of cutting needs, the team needed two cutters to enable them to provide the highest quality product for their customers.

## How Product Helped

The team uses the Excalibur 5000 to cut board for backing to art and photographs and also uses the Ultimat Gold for the production of mounts for art and photography.

## Testimonial

Fine Art Incorporated says: "Keencut cutters are by far the best products on the market. All our colleagues in the framing business around here use the Keencut products. We particularly love their straight forward ease of use and build quality and are very satisfied with both products and would not hesitate to recommend them."
