

**Company:** Wimbledon Studio Framers  
**Location:** Wimbledon, London, UK  
**Product:** Excalibur 5000  
**Application:** Picture Framing Services

## Executive Summary

Wimbledon Studio Framers added an Excalibur 5000 to the studio in August 2018. This was the second Keencut product they had purchased following the purchase of an Ultimat Futura when it first opened five years ago. The studio also has a few straight edges.

## Challenges

Wimbledon Studio Framers needed a consistent, accurate, efficient and hard-wearing cutter for cutting glass, MDF, artboard, mountboard, mirror glass and foamboard that could be used on a daily basis.

## How Product Helped

The team have said that the Excalibur is truly like having an extra bench/pair of hands, when space is invariably tight in the workshop. It has given them the confidence knowing that whatever the studio is cutting, the end result is going to be truly square! It really is the ultimate vertical cutter for the professional picture framer.

## Testimonial

Jonathan Jackson says of the Excalibur 5000 "I chose the Excalibur because I believe Keencut is producing the best framing equipment available and I am 100% satisfied with my choice. I wish I had invested in it from day one of starting my business.

I also trust Keencut as a business as when I had an issue with my Futura, I visited the factory in Corby and received fantastic advice and practical help and repair of my machine."
