

JAVELIN S2

Convenient, portable cutting solution for maximum accuracy

KEENCUT
THE WORLD'S FINEST CUTTING MACHINES

Simple to transport to your workspace, the Javelin S2 is a safe, robust high precision cutter

- Keencut cutters are the most accurate on the market
- Assured precision in a portable cutter
- Versatile cutter for a wide range of materials
- Safety by design
- Reduces cutting time
- Keeps wastage to a minimum
- Quick-fit interchangeable tools
- Simple and instinctive operation
- Calibrated for immediate 'out of the box' accuracy
- Manufactured and finished with premium quality materials
- Guaranteed for 5 years

Available in 5 sizes from 110cm to 310cm

Perfect for cutting ...

Semi-rigid materials

- Cardboard, PVC foam board, corrugated plastic, foam-centred board up to 13mm
- Mountboard and conservation board up to 3.5mm
- Flexible polycarbonate up to 3mm

Flexible materials

- Tough materials: banners, magnetic sheets
- Film and self-adhesive vinyls

Rigid materials (scoring)

- Cast acrylic or Plexiglas up to 3mm

If your material is not in the list above we offer a free test cut service - for details please email sales@keencut.co.uk

"Not only is the quality of these cutters unbeatable, but the consistency from graphic cut to graphic cut is simply phenomenal."

Casey Ford, Owner and CEO The Durafran Co.

**MADE IN
BRITAIN**

Ultra High Precision - Guaranteed to cut within 0.2mm of a straight line for the whole length of the cutter

www.keencut.co.uk

Accurate and versatile

Factory calibrated using laser technology for maximum accuracy. Guaranteed to cut within 0.2mm of a straight line for the whole length of the cutter.

Single tool cutting head allows single handed cutting action. A choice of three blade holders provide maximum cutting options.

Portability

Professional tool that combines quality and accuracy in a convenient portable form.

Reduces cutting time

The **interchangeable blade holders** enable the operator to switch quickly between tools to suit different materials.

Safety by design

The Javelin S2 overcomes the safety hazards of using other portable methods of cutting, such as a hand knife and straight edge. All blade holders come with automatic blade retraction and/or guards for safety.

OPTIONAL EXTRAS AND ACCESSORIES

Optional BigBench (worktop not included)

With an aluminium cutting base, silicon grip cords and full-length cutting groove the BigBench, when coupled with the Javelin S2, creates a complete cutting solution.

Supplied with a pair of integral lift & hold mechanisms, the BigBench enables the Javelin S2 to be suspended above the work surface for easy loading and positioning of media.

The bench is constructed from high grade alloy for supreme strength and resilience. The unique lock joint provides an ultra-rigid structure and ensures safety under heavy loads.

Graphik blade holders (included)

Purpose-designed for tougher material like PVC foamboard where extra blade stability is required.

- The Graphik blades are manufactured from high-grade steel and have a special tip design for increased durability and reduced tip breakage.
- Orientates for left-right or right-left cutting.
- Sliding blade depth adjuster allows for quick and easy blade extension up to 13mm.

Medium duty blade holder (included)

For use with standard off-the-shelf utility blades for lighter-duty applications, where a heavier-duty Graphik blade is not required. Adjusts to a maximum blade depth of 10mm.

Circular blade holder (included)

To cold cut delicate textiles and other fabrics without snagging and is also ideal for trimming banners and posters where a knife would be too aggressive.
