

A new era in print finishing. Keencut PowerTrak – Cutting Made Easy

Whatever you cut, the PowerTrak delivers.

Simply fit the cutting head, align the material, and press the lever—it's fast, precise, and effortless. It cuts a huge selection of rigid, semi-rigid and flexible materials – that's everything from ACM, and foamboard to banners and delicate fabrics, all cut and finished with ease. One cutter does it all, even v-grooving ACM and scoring acrylic.

The compact cutter is practical for any-sized workplace and with wheels and adjustable legs, it moves wherever your workflow demands.

Precision cutting has never been this easy.

Materials cut

Rigid materials

Aluminium composite panel e.g Dibond $\leq 4\text{mm}$ (1/8")
Steel composite panel e.g Multishield $\leq 3\text{mm}$ (3/32")
V-grooves ACM e.g Dibond $\leq 6\text{mm}$ (1/4")
MDF $\leq 3\text{mm}$ (3/32")
Cast acrylic / Plexiglas (scoring only) $\leq 3\text{mm}$ (3/32")

Semi-rigid materials

PVC foamboard $\leq 13\text{mm}$ (1/2")
Corrugated/fluted plastic $\leq 13\text{mm}$ (1/2")
Corrugated cardboard $\leq 13\text{mm}$ (1/2")
Foam centred board $\leq 13\text{mm}$ (1/2")
Mountboard $\leq 6\text{mm}$ (1/4")

Flexible materials

Banner
Vinyl
Film
Magnetic sheet
Textiles
Leather
Wallpaper
Paper
Self-adhesive vinyl
Tissue paper
Delicate fabrics

- Cuts everything from fabric to aluminium composites
 - Trusted Keencut precision and reliability
- Quick to set up, and simple to master – start cutting straight away
- Safe, effortless cutting, even on large boards and tough materials
 - Compact design on wheels to move around your workshop
 - 5-year guarantee

Effortless and easy to use

Align, clamp and push the button! Ultra-precise alignment in seconds using the sightline strip and Keencut clamping system. Once clamped, set the dial to the material you are cutting and pull the lever.

Compact, mobile and height adjustable

With its compact design, the PowerTrak is practical for any-sized workplace.

Height-adjustable legs and wheels allow the PowerTrak to be positioned optimally for your workflow – it's completely flexible! And, as it cuts without dust or debris, it can be placed next to your printer.

Identical boards and material support

Pull-out support arms hold the material. Just pull out the arms, place your material into the machine, and if you want to cut a series of identical boards, set the arm stops. You can buy optional arms for the back of the machine.

Easy to install, quick to master

1.30 hours to install, 15 minutes to master. It's out of the box calibrated and ready to go! Just add a compressor or fit to your air line. You only need one operator with no specialist skills.

Safe

Operator safety is paramount, and the PowerTrak will not operate until the protective guard is in position. There is also an emergency stop button next to the operator controls.

Everything to hand

Every feature is for easy and speedy operation. The easy-empty waste catcher lifts off to slide materials into a bin. The cutting heads sit in caddies on the machine, and a fabric bar is immediately to hand to insert for fabric cutting.

Reliability guaranteed

All this and Keencut's acclaimed manufacturing reliability. The PowerTrak is manufactured in the Keencut UK facility using high-quality components and has a 5-year warranty.

Heads

C4 Quad Wheel Cutter (QWC) for ACM

Triple Graphic Pod for PVC foamboard

Medium Duty Pod for Foam centred board, Corrugated/ fluted plastic,
Corrugated Cardboard, Mountboard

Rotary Pod for banners, vinyl, film, textiles and delicate materials

Acrylic Pod scoring Cast Acrylic/Plexiglass for snapping

V-Groover for V-grooving ACM

Five year guarantee

Like all Keencut machines, the PowerTrak is built to give many years of excellent service. All components are manufactured in-house to ensure quality and all PowerTrak cutters come with a five-year comprehensive guarantee. [Register your product to activate your guarantee >](#)

In the box

100 medium duty utility blades

100 graphik blades

1 45mm circular blade

1 3mm V groove tool

Accessories

Medium duty utility blades

A double ground edged, reversible blade suitable for cutting all types of materials
