

## **Save money - cut your own**

Having materials pre-cut to size costs money. With delivery charges rising rapidly, getting your boards pre-cut and delivered can sometimes cost up to 20-25% per cent of an average order. You must decide whether to lose margin or risk increasing prices and losing the order.

Pre-cut boards don't save time as you must treat each board individually. With a Keencut SteelTrak in your sign shop, you can buy larger, more cost-effective boards, apply the print to the entire board and then cut it to size. The largest SteelTrak 250 will cut and finish 2.4m x 1.2m (8' x 4') sheet materials in one pass.

With the Keencut SteelTrak, everything is under your control. There are no more delays waiting for boards to arrive and no quality issues. The SteelTrak cuts cleanly and finishes without dust or debris. Unlike bandsaw pre-cut boards, the SteelTrak will not tear the plastic or leave dust in the fluting. The quality of the cut matters. Poorly cut dusty boards will cause expensive errors when you come to apply the vinyl.

The SteelTrak is also incredibly fast. In the latest time challenge, the SteelTrak cut 6 identical boards in less than 2 minutes! It really does Fast Forward your print finishing.

The SteelTrak has an amazing return on investment. You save by buying more cost-effectively, you control your stock, ensure quality, and can use the offcuts.

So, choose the Keencut SteelTrak and watch costs go down and output go up!
